

FutureTech University

Admission Guide

For Applicants Entering Fall 2026 or Spring 2027 | Issued by the Office of Admissions

This guide explains how to apply for undergraduate admission to FutureTech University. It should be read together with [tuition_policy.pdf](#) for cost information and [scholarship_info.txt](#) for available financial aid. Graduate admission follows a separate process; prospective graduate applicants should contact graduateadmissions@futuretech.edu.eg.

1. Undergraduate Programs Offered

FutureTech University offers Bachelor's degree programs through its eight departments: Computer Science; Artificial Intelligence & Data Science; Electrical & Electronics Engineering; Mechanical Engineering; Business Administration; Architecture & Design; Biomedical Engineering; and Mathematics & Basic Sciences (offered jointly with other engineering programs as a foundation year). Full department descriptions are available in [departments.docx](#).

2. Admission Requirements

Applicants to FutureTech University must meet the following general requirements:

- A recognized secondary school certificate (or equivalent) with a minimum overall grade of 75%. Engineering, Computer Science, and Artificial Intelligence & Data Science programs require a minimum grade of 80% with a strong mathematics component.
- A passing score on the FTU Admission Assessment (required for Engineering, Computer Science, and Artificial Intelligence & Data Science applicants only).
- A portfolio or personal statement (required for Architecture & Design applicants in place of the Admission Assessment).
- Satisfactory results on an admission interview for Business Administration applicants.
- For all applicants, submission of the required documents listed in Section 3 below by the relevant deadline listed in Section 5.

Meeting the minimum requirements does not guarantee admission. FutureTech University receives significantly more qualified applications than available seats each year, and admission to competitive programs (particularly Computer Science and Artificial Intelligence & Data Science) is based on a holistic review of academic performance, assessment scores, and available capacity.

3. Required Documents

All applicants must submit the following documents through the Applicant Portal:

- Completed online application form.
- Official secondary school certificate or equivalent.
- Official academic transcript covering the final two years of secondary study.

- Two recent passport-sized photographs.
- Copy of national ID (for domestic applicants) or passport (for international applicants).
- Non-refundable application fee of \$40 (domestic) or \$60 (international).

3.1 Additional Documents for Specific Programs

- Architecture & Design: a design portfolio of 5-10 original works.
- Scholarship applicants: see scholarship_info.txt, Section 3, for scholarship-specific document requirements, which are submitted separately from the general admission file.

4. International Student Requirements

In addition to the general requirements in Sections 2 and 3, international applicants (defined as applicants who completed secondary education outside of Egypt) must submit:

- A certified secondary school equivalency evaluation from a recognized evaluation agency, confirming the applicant's certificate is equivalent to the Egyptian secondary school certificate.
- Proof of English language proficiency: a minimum IELTS Academic score of 6.0, or TOEFL iBT score of 79, or successful completion of the FTU English Placement Test. Applicants who do not meet this requirement may still be admitted conditionally into the Academic English Bridge Program (see Q7 in faq.txt).
- A valid passport with at least 12 months of remaining validity at the time of application.
- Proof of financial support for at least one academic year, such as a bank statement or sponsorship letter.
- A completed Student Visa Sponsorship Request, submitted to the International Student Office after conditional admission is granted, to support the student visa application process with Egyptian immigration authorities.

International students should also review the housing information in campus_services.docx, Section 6, as on-campus housing is available on a priority basis for international students.

5. Application Deadlines

Intake	Early Decision Deadline	Regular Deadline	Late Deadline (with \$50 fee)
Fall 2026	March 15, 2026	August 15, 2026	August 29, 2026
Spring 2027	October 1, 2026	December 15, 2026	January 5, 2027

Early Decision applicants receive a non-binding admission decision approximately 6-8 weeks after submission and are given priority consideration for the Presidential Full-Ride Scholarship (see scholarship_info.txt, Section 5, for scholarship-specific deadlines, which may differ slightly from general admission deadlines). Regular Decision applicants are notified on a rolling basis, typically within 4-6 weeks of a complete file being received.

6. Admission Process

The admission process consists of the following steps:

- Step 1: Create an account on the Applicant Portal at apply.futuretech.edu.eg.
- Step 2: Complete the online application form and upload all required documents listed in Section 3 (and Section 4, if applicable).
- Step 3: Pay the non-refundable application fee.
- Step 4: If applying to Engineering, Computer Science, or Artificial Intelligence & Data Science, schedule and sit the FTU Admission Assessment at one of the designated testing centers or online under remote proctoring.
- Step 5: If applying to Architecture & Design, submit the design portfolio through the portal. If applying to Business Administration, schedule the admission interview.
- Step 6: Track application status through the Applicant Portal; decisions are also emailed from admissions@futuretech.edu.eg.
- Step 7: Admitted students must submit a non-refundable enrollment confirmation deposit of \$200 within 3 weeks of the offer date to secure their seat. This deposit is credited toward the first semester's tuition invoice (see [tuition_policy.pdf](#), Section 2).
- Step 8: Complete new-student registration, including course registration, orientation sign-up, and (if applicable) housing and scholarship applications.

7. Transfer Applicants

Students currently enrolled at another accredited university may apply as transfer students. A maximum of 60 credit hours may be transferred toward an FTU degree, and a minimum grade of C is required for any individual course to be eligible for transfer. Transfer credit evaluations are performed by the relevant department chair after admission; see [faculty_contacts.docx](#) for department chair contact information.

8. Frequently Asked Admission Questions

Do I need to submit my results from a specific standardized exam?

No single external standardized exam is required. Engineering, Computer Science, and Artificial Intelligence & Data Science applicants take the FTU-administered Admission Assessment described in Section 6 instead.

Can I apply to more than one department?

Applicants may list a first-choice and second-choice department on the application form. If not admitted to the first-choice department, the Admissions Committee will automatically consider the applicant for the second-choice department where capacity allows.

What is the acceptance rate at FutureTech University?

The overall undergraduate acceptance rate for the 2025-2026 admission cycle was approximately 42%, though rates vary significantly by department, with Computer Science and Artificial Intelligence & Data Science being the most competitive at approximately 25%.

If I am admitted, when do I need to decide on scholarships?

Scholarship deadlines are separate from admission deadlines and are listed in [scholarship_info.txt](#), Section 5. Applicants seeking the Presidential Full-Ride Scholarship should apply for admission as early as possible, ideally by the Early Decision deadline, since the scholarship deadline of June 30, 2026 falls before the Regular Decision admission deadline.

Is the application fee refundable if I am not admitted?

No. The application fee described in Section 3 is non-refundable regardless of the outcome of the application.

Can I defer my admission to a later semester?

Admitted students may request a one-semester deferral by submitting a Deferral Request Form to the Office of Admissions no later than 2 weeks before the start of the semester for which they were originally admitted. Deferrals beyond one semester require a new application.

For additional admission questions not covered here, see [faq.txt](#), Section 1 ("Admissions"), or contact the Office of Admissions at admissions@futuretech.edu.eg or +20 2 2589 3000, located in Building C, Room C-005.
